

# Cross Domain Development Kit | XDK

## Start your Sensor X - perience

### The universal programmable sensor device & prototyping platform for any IoT use case you can imagine!

Make use of the power to monitor, control and analyze your product remotely over Bluetooth or Wireless Network. In this way, devices, products or machines become connective and smarter. XDK is now released for 24/7 usage giving you the freedom to use it either for short-term proof of concepts or long-term projects. Inclusive of multiple Micro-Electromechanical Systems (MEMS) sensors, various parameters for condition monitoring or predictive maintenance get recorded.

You can decide between a rapid prototyping kit (XDK110) and as a professional bundle (XDK Node) in a package of 10 pieces. The **XDK110** device was designed for rapid prototyping and allows users an easy transition from prototype to mass production by providing a clear road to product development.

The **XDK Node** – Professional Bundle includes 10 pieces of XDK110 devices with an optimized scope of delivery which enables a cost effective deployment for larger projects and simplifies the installation.
