

# Patch Management by TeamViewer

Automatic Software Vulnerability Detection and Patching

**Only one unpatched device puts your entire IT at risk.**

Patch Management by TeamViewer is your integrated solution to **detect and patch vulnerable, outdated software**. Keep your IT infrastructure up-to-date and safe by automatically evaluating and applying **Windows OS and 3rd party application patches**.

## Windows Updates

Keep your Windows devices up-to-date by managing and deploying Windows updates from a central locations.

## 3<sup>rd</sup> Party Applications

Don't put your IT at risk by only focusing on OS updates. Monitor and deploy patches for 3rd party applications automatically.

## Custom Policies

Define individual policies to accommodate the varying needs of your end-users, entire departments, or different customers.

## Automation

Automate your patching process! Automatically detect and patch software and OS vulnerabilities.

Patch Management is part of  
TeamViewer Monitoring & Asset Management

## Supported 3<sup>rd</sup> Party Applications

Scan or click the QR code to see the hundreds of supported 3<sup>rd</sup> party applications.

## Comprehensive & Intuitive

Patching doesn't have to be complicated

With Patch Management by TeamViewer, you will not spend hours familiarizing yourself and your staff with an un-intuitive solution.

Benefit from a solution that is easy-to-use, yet comprehensive and agile.

Quickly see the update statuses of your devices, and all available patches from one convenient location.

Search	Group	Device	Importance
<input type="text"/>	All	DEV-OF12-A-13	All
