

Single User Business License

Designed for Entrepreneurs, IT and Business Professionals, and Telecommuters

- ✓ 1 Licensed User
- ✓ 1 Concurrent Connection (Channel)
- ✓ Unlimited Endpoints

Single User Business License Feature Highlights

- ✓ **1 licensed TeamViewer user** that can start connections from 3 designated devices (computers, laptops, or mobile devices).
- ✓ **1 concurrent connection (channel)** so at any given time, you can use a channel to open a remote session from any of your 3 designated computers or mobile devices to connect to up to 3 devices at the same time, in separate tabs, for productive multitasking.
- ✓ **Unlimited endpoints**, so you can remotely access, support, and control as many attended devices as needed (i.e., desktop computers, laptops, phones*, or tablets*). For attended access to laptops or desktops, support recipients simply run a QuickSupport module, then accept incoming connection requests to allow one-time remote support sessions. For attended access to mobile devices*, support recipients run the TeamViewer Quick Support app, then accept incoming connection requests to allow remote support.
- ✓ **200 managed devices**, so you can remotely access, support, and control unattended devices, such as servers, point of sale (POS) systems, digital signage, or kiosks. Unattended devices must have the TeamViewer Host app installed on them in order to not require another person to accept an incoming remote connection request in order to connect.
- ✓ **TeamViewer Meeting**, so each licensed user can host a secure videoconference or VoIP call with up to 10 participants. Collaborate using instant chat, screen sharing, and more across devices and platforms — anywhere you meet. *(Hosting meetings with up to 300 participants requires a TeamViewer Meeting subscription upgrade. Learn more at teamviewer.com/meeting.)*

**Remote Connections to mobile devices from computers require the Mobile Device Support AddOn.*

How it works

When accessing or providing remote support for devices, there's no charge to you or your support recipients to establish incoming remote connections. That means you can use your TeamViewer licensed devices to remotely access and support an unlimited number of endpoints (computers, servers, or mobile devices*).

Can I purchase a Single User Business License and share my TeamViewer account with other people?

TeamViewer does not recommend sharing your account with other people as they will have access to the same files and folders as you do, which is like giving your personal email login credentials to your colleagues.

NOTE: Remote connections from servers are not possible with a Business License. Connecting from servers requires a Premium or Corporate License.

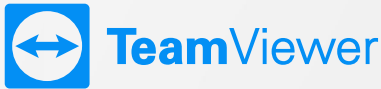

*Remote Connections to mobile devices from computers require the Mobile Device Support AddOn.

TeamViewer Security

Your Security Is Our Top Priority

All remote sessions are secured by end-to-end encryption.
