

TeamViewer Web Monitoring

Monitor and improve the performance of your website.

TeamViewer Web Monitoring

Make sure your website runs at peak performance.

Turn visitors into customers by providing them with the best possible user experience. Slow and unresponsive websites are a bad experience for your customers. Broken processes, ever-loading pages, and downtime might turn visitors away from your business, and will negatively impact search engine results. Monitor, analyze and improve the performance and user experience of your website with TeamViewer Web Monitoring.

30+ Server Locations

Monitor your websites from 30 server locations worldwide and ensure peak performance for everyone.

High Check Frequency

Check your website continuously, even every minute, and don't miss a thing.

Graph View

Easily spot bottlenecks and other issues without having to dig through endless data sets.

Uptime Monitoring

Is your website up and available everywhere?

Check the availability and response time of websites with TeamViewer Web Monitoring – entirely cloud-based! Our servers will check your website continuously and will inform you immediately, if your page is down or is taking too long to respond.

Basic Monitoring

Page Load Monitoring

How long does it take your website to fully load?

Constantly monitor the time your website takes to fully load – from beginning to end, including all elements such as images, JavaScript and CSS. Uncover and fix bottlenecks due to broken scripts, or too large images, and provide your customers with an optimized end-user experience.

Transaction Monitoring

Are all important processes such as your web shop working?

Monitor transactional processes such as shopping carts or registrations, and ensure your e-commerce engine is running without any leaks. The transaction monitor continually simulates end users' interactions with your website, and monitors availability and response times along the funnel process.

Advanced Monitoring

Take Your IT Service Management to the Next Level.
